

Team Workflow

Every member creates a feature branch from dev.

Example:

git checkout dev

git pull

git checkout -b feature/harshida-backend

or

git checkout -b feature/vishakha-frontend

Work is done there.

Then

feature branch

↓

Pull Request

↓

dev

↓

Review

↓

Merge

↓

When dev is stable

↓

Pull Request

↓

main

As the reviewer, you'll merge dev into main after checking changes.
